TO THE PUBLIC.

The tracts embraced in the above proclamation of the President comprise all the residue of the lead mines yet to be brought into market south of the Wisconsin river. They cover those mines (particularly the portion situated in Illinois) worked under former leases from the Government which had not expired at the date of the sale of the adjacent mines, and therefore possess the advantage of being prepared for immediate operations without incurring the increased expenses incidental to opening new mines, and most of them are believed to be very productive. They are all more or less conveniently situated in reference to the navigable rivers and other cheap means of transportation of their products to St. Louis, and are in the midst of a country yielding abundantly all the agricultural products of the latitude in which they are located.
